Facebook Privacy

Case 2 Questions :

Q1 : Do people who use Facebook have a legitimate claim to privacy when they themselves are posting information about themselves ?

A1 : The answer is yes. In the setting for Facebook users there have some options to let user to choose what to show and what to hide.

Q2 : How will changing your Connection settings on Facebook help protect your privacy ?

A2 : Open the Setting page, I will make anything hide as choice beside my friends.

Q3 : How can you prevent your Timeline from being indexed by Google or other search engines?

A3 : Go to the setting page, find the option who can see the posts you have been

Data Mining for Terrorists and Innocents
Case 3 Questions :

Q1 : Does the Tucson data-mining project inappropriately violate the privacy of Internet users, or is it an acceptable trade off to more intelligently combat terrorism ? Explain your answer.

A1 : Yes. This project violates the privacy of Internet users, but on the other hand, is this worth for trade off ? I will stand in the position side.

Q2 : Were the local police justified in their handling of Holm ? Why or why not ? For whichever view you take, briefly describe the opposing viewpoint.

A2 : How to confirm of accusing someone in or not as a terrorist is an issue. Stand in the safety of communities, is probably necessary.

Q3 : What other issues dealing with data and privacy have you encountered on the Web ?

A3 : Lots of websites, or apps are collecting user data. Then storage these datas to analyzing, whatever searching history, shopping records, to advertise more relative things, or service.

Q4 : What is meant by the "Dark Web" ?

A4 : Dark Web is a program which is created by some students of University of Tucson. The Dark Web program analyzes chat room conversation between potential terrorist threats.
